Received the Virginia Health Care Foundation's inaugural **Safety Net Health Innovation Award** for the Diabetes Impact program. The award recognized the integration of primary care, behavioral health, oral health, medication therapy management and health education services to improve diabetes health outcomes for a cohort of homeless individuals.

In CY 2018, our Medication-Assisted Treatment program which combats the community's opioid epidemic served **97** program participants with **3,135** recovery sessions.

After a national search, **a new CEO** was hired and began her tenure on May 1.

Began offering long-acting reversible contraceptives (LARCs) to uninsured and underinsured women at **NO COST** to the patient.

Recognized by Health Quality Innovators as the first FQHC (federally qualified health center) in the nation to complete all five phases of a practice transformation initiative that focuses on patient-centered care, better health outcomes and thriving as a business in a value-based setting.
